

My name is Cindy Chang, but I go by Cece. I am currently a first-year electrical engineering student at UCLA. I was born in a small town in Montana and moved to the DC area when I was seven. I graduated from Thomas Jefferson High School for Science and Technology. I have always been interested in science classes. I come from a family of engineers and physicists so electrical engineering has always been in my line of sight, but I wasn't sure about it until I was given the chance to take engineering classes in high school. One of the reasons I chose electrical engineering was because of the research and career opportunities and its versatile applications. The logical processes involved in the problem solving also drew me to this subject. I am excited for the next four years at UCLA. I plan on doing design for a newspaper or magazine. I also plan on applying what I learn in class to Bruin Racing. I plan on being an active member of SWE. I'm looking forward to what I will accomplish here.
