

Mark Nasielski – EE Fast Track Program

My name is Mark Nasielski, and I was born and raised in San Diego. I attended Westview High School and I am currently a first year student at UCLA majoring in Electrical Engineering. The reason I am interested in Electrical Engineering is that I believe it is one of the most useful and dynamic fields of engineering and can be used to solve many of the problems of today and tomorrow. I also find love to do math and physics, which makes a good foundation for EE. I initially became involved in engineering projects by attending a summer camp in which we used Arduino microcontrollers, which I thought was really fun. I then ordered my own Arduino kit and created several small projects independently which utilized both hardware and software concepts. I am currently unsure exactly what kind of work I'd like to do in the future but I'm sure involvement in the various clubs and classes here at UCLA will offer guidance with respect to that. The wide variety of opportunities at UCLA makes me excited to see what is in store these next four years.
