

Nicolas Zani - EE Fast Track to Success Program

My name is Nicolas Zani, and I am a first year Electrical Engineering student at UCLA. I grew up in Orange County, CA, as a student in love with everything math-related. While attending Capistrano Valley High School, my alma mater, I found a love for physics as well, directing my passions towards applying these subjects. I have always enjoyed problem solving and computers, from taking them apart to generally using and working with them, and found a good balance of it all in engineering. In high school, my father, who works in a physics lab, showed me the inner workings of many machines, and explained how various computational and physics devices work; my interest for these drove me towards electrical engineering. Though I am unsure of my exact path in this vast field, I eagerly seize every engineering opportunity to try something new, through clubs or otherwise, so I may better find my future path through UCLA and beyond.
