

# Noosha Rahimi

## Ucla Fast Track - Class of 2027

### Hello!

My name is Noosha Rahimi, and I am studying computer engineering at UCLA. Though I enjoy living in Los Angeles, I loved growing up in Orange County, California. I graduated from Capistrano Valley High School and am excited to share this new journey with many of my high school friends as well as all the friends I make along the way. Some of my interests include playing volleyball, completing puzzles, going to the beach, trying new coffee shops, and playing piano.

### Why ECE?

I knew I wanted to be a Computer Engineer as I grew more interested in math, physics, computer science, and new technological advancements. I love problem-solving and working with others to make positive changes. My dad has been my biggest influence in choosing this academic field. As an electrical engineer himself, I grew up playing problem-solving games and trying to understand the “why” behind every situation.

### Why UCLA?

Since I was a kid, I dreamed about studying at UCLA. The academic and social culture at UCLA is truly heartwarming and welcoming. Specifically, the ECE department has welcomed new students with open arms and always made me feel supported. Campus life at UCLA is very exciting as there is always something going on.

### Educational and Career Goals

I plan on pursuing a Master’s Degree and then either my PhD or an MBA. I hope to work in a tech company in the future or possibly have my own start-up. I love working in a team environment as I develop my technical skills alongside my leadership skills. I hope to make a positive impact on the world and use my education at UCLA to do so.
