

Research Opportunities in Terahertz Electronics Laboratory

Terahertz Electronics Laboratory has a number of research projects related to terahertz imaging and sensing systems. We are looking for highly motivated senior undergraduate and masters students in electrical engineering, mechanical engineering, and material science. The projects will start with a trial phase and, depending of the research productivity, will be converted to a funded research.

Students interested in these positions should email their CV to Prof. Mona Jarrahi mjarrahi@ucla.edu to schedule an interview. The interviews will start on November 15th and will continue until the positions are filled.
