

Tony Fan

Hi! My name is Tony Fan, and I'm an Electrical Engineering student at UCLA! I'm from Arcadia, California. Before moving to California, I went to Newton South High School in Newton, Massachusetts, a few miles outside of Boston. Outside of school, I enjoy taking pictures, watching films, and hiking along Southern California's beautiful trails.

My interest in ECE began way back when I was in middle school, experimenting with electronics as a hobby. In high school, I was an active member of my school's FRC Robotics Team, where I led the manufacturing team in designing and building key components for our robots in competitions. These hands-on experiences helped me dive into both the theoretical and practical aspects of technology, and I realized that I wanted to study a field that blends both hardware and software skills.

I chose UCLA because of its exceptional engineering program, vibrant student life, and close access to the tech industry in Los Angeles and across California. UCLA also offers a wide range of academic and extracurricular activities. Currently, I'm involved in UCLA IEEE and UCLA ACM, where I've met incredible peers and mentors who've helped me grow technically and personally.
