

# Wilson P Wu

## ECE Fast Track - Class of 2029

### About Me

Hello! My name is Wilson P. Wu, and I am studying electrical engineering at UCLA! I grew up in Silicon Valley, and I am excited to start a new chapter of my life in Los Angeles! Some of my interests include working out, creating art, playing League of Legends, going on long walks, and reading manga!

### Why EE?

As a kid, I always have been fascinated with the glucose monitors and how they function, which built my interest towards technology. In my freshman year of high school, I joined my school's robotics team, which gave me my first exposure to engineering principles. While I initially focused on the programming and data analysis aspects of robotics competitions, I began to develop an interest in the electrical side of robotics through being a part of different outreach events. Seeing that electrical engineering combines the best worlds from programming and the mechanical side of technological devices, I decided to pursue electrical engineering as my major.

### Why UCLA EE?

I chose UCLA ECE because of the amazing balance of academics and social life. UCLA has an amazing academic reputation, with numerous engineering clubs and research opportunities, while offering great campus life and various social opportunities. Through UCLA's engineering, I believe I can grow into an capable leader in the field of engineering.

### Career Goals

In the future, I want to be able to create sustainable and accessible biomedical devices and computer systems for different communities! Additionally, I also aim to become a STEM teacher to spread STEM education to future generations. Although I don't know 100% which industries or career path I might pursue, I am confident that UCLA's amazing education and academic opportunities will allow me to grow as an engineer.
