

# ANDY LEWIS

**Hometown:** Colorado Springs, CO

**Hobbies:** Guitar, AFPS, Web Dev

## **Why did you choose UCLA ECE?**

I always liked computers and engineering in high school and would compete in cybersecurity CTF competitions. Electrical engineering seemed to be a nice intersection of hardware and software that combined my previous experiences.

## **How are you involved at UCLA?**

Right now, I am an officer in ACM Hack, a CS club where we host weekly workshops teaching software engineering and other full-stack related concepts. I also work in the ELFIN cube-sat lab doing mostly full-stack software engineering for the satellite operations software.

## **What are your educational and career goals?**

My main goal with education is to just learn and experience as much as possible at UCLA to take with me into industry. I'm sure I'll come back to pursue a master's or even Ph.D., but for right now I want to gain more experience outside of academia. As for a career, I'm orienting myself more towards software but am open to try anything whether it's doing data science in big tech or working on app development at a startup.

## **What projects are you taking on in your own time?**

I am creating a personal portfolio website using THREE.js and Unity, as well as working on some other super-secret web dev projects. I'm also working on making music/learning how to draw!
